Key Qualifications

4th year student of Industrial Economics and Technology Management (Indøk) with a specialization in finance, computer science and artificial intelligence.

Education

08.2020–06.2025

M.Sc., Industrial Economics and Technology Management (Indøk) – NTNU

- Specialization in finance, computer science and artificial intelligence.
- In preparation for my master's thesis in finance next year, I am currently taking courses on empirical and quantitative approaches in financial econometrics, asset/option pricing theory and AI programming.
- GPA: 3.58

Work experience

06.2023–08.2023

Summer Intern, Kystverket, Ålesund

The project focused on exploring how the Norwegian Coastal Administration (Kystverket) could leverage machine learning for image recognition. We employed an object detection algorithm to classify building colors, aiming to enhance the realism of Kystverket's digital twin. Furthermore, we developed a model capable of identifying various objects aboard ships. Our deliverables included a proof of concept, complete with a codebase, detailed tutorials, and a thorough report. This provision ensured that Kystverket had a solid foundation to further build upon our initial work.

01.2022–05.2022

Teaching Assistant, NTNU - Faculty of Information Technology, Mathematics and Electrical Engineering, Trondheim

- TDT4100 - Object-oriented programming with Java.
- I assisted students with their assignments and projects in the course.

06.2015–08.2021
